

DuoMat

This industry sole cleaner DuoMat working as a lock should be used as a forced pathway which all users have to pass. Its compact size fits small and large passages and, however, cannot be avoided due to its length. This high quality industry devices are made entirely of strong construction and durable graphite paint coating. Stainless steel platform is located above the horizontally brush and can be opened. The drive is started by pushing the green button. Durable rotating nylon brush is able to effectively clean even dirtiest shoe soles from the dust and dirt. The runtime is adjusted by time switch. DuoMat System is made for dry cleaning where brushed off dirt will be collected in a drawer at the bottom of the machine, which can be easily pulled for cleaning. The brush on the stainless steel axle can be easily dismantled and washed in water with detergent. Many users keep a second set of brushes on hand to minimize the downtime while cleaning the brushes. Due to its features it is indispensable in every clean zone.
