

Practic

Durable shoe cleaning machine designed for everyday intensive exploitations. It is solid and esthetic and characterizes with strong construction and durable graphite paint coating. two sets of cleaning and polishing brushes gather dirt from shoes and store it on a removable easy-to-clean mat. The upper part with lockable doors can be used as a locker. There is a covered container for 1 liter of shoe polishing cream. An automatic time switch protects the device from being left on without supervision. This specific model is devoted to offices, banks and places where functionality and esthetics are appreciated. It is an efficient alternative to individual shoe polishing sets in multi-room buildings like hotels. This type of device gains its users trust due to its reliability and usefulness.
